Webinar:

Course Description

The Level of Care Protocol was developed for use by county child welfare and probation staff as a strengths-based approach to identifying the individual needs of foster children and matching those needs to a Home-Based Family Care (HBFC) rate (Board and Care Rate), including if applicable, an Intensive Services Foster Care (ISFC) rate, to support their placement in a family setting. The protocol contains five domains (Physical, Behavioral/Emotional, Health, Educational and Permanency/Family Services Domain), separately scored, and designed to promote best practices in meeting the individual needs of children/youth in the foster care system."

Date and time

The webinar will be open to listen to the recording on April 10, 2017. Once you enroll, you will receive a confirmation email which contains the link to listen to the webinar.
